Expertise & SEO knowledge

Semantic SEO | Technical SEO | Local SEO | On-page & off-page SEO | Content strategy | Link building | Keyword research | Programmatic SEO | GEO & AEO | Reddit SEO

Entity-focused semantic SEO

I apply an entity-first, holistic approach that positions each website as an authority in its niche. Koray Tugberk Gubur's topical authority methodology shapes this approach.

Content and topical authority

I design topical maps and content architectures that cover a niche in depth. Structured briefs pair entity-based optimization with search intent and semantic relevance.

SEO patents and whitepapers

I study Google's patents and whitepapers on ranking signals and semantic search. I turn the findings into practical SEO strategy.

Programmatic SEO, GEO and AI search

I launch programmatic SEO systems for large keyword sets. I structure content and entities so brands appear in AI answers on ChatGPT, Gemini, Perplexity and Google's AI Overviews.

SEO hypothesis testing

I test SEO ideas with experiments on AI-generated content, exact match domains and technical variables. The results show which changes move rankings.

Reddit SEO

I earn topical relevance, referral traffic and visibility in Google and AI search through Reddit participation, discussion-led content and brand mentions.
